Why Buy From Us?

All of our products are derived from one source and inspected. We have partnered with several third party, independent laboratories in order to provide transparency and confidence in our brand for our customers. Botanical testing includes lab analysis testing for alkaloid content, heavy metal contamination and any other possible impurities and pathogens. Regardless of the test results, all of our products are then treated in a high temperature pasteurization process in a USA based CGMP compliant facility. The process does not impact the Mitragynine content. The product is then tested again to assure it is free from any pathogens such as Salmonella, Staphylococcus, Aureus, Pseudomonas etc.

We can honestly say we take pride in being able to offer a top quality product, the best and cleanest on the market today. We believe in what we do and stand behind our products.
